Inventory of 20th Century Painting & Sculpture

- 1,795 artists represented
- Roughly 24,500 slides
- Inventory was conducted in similar fashion to general collection
- Steep curve – 79% of all artists in the collection are represented by less than 8 slides

During inventory, we collected the names of the artists and estimated the number of slides per artist. The estimated margin of error for artists represented by more than 50 slides is about 10%, and gradually increases as the number of slides per artist decreases. This margin of error is a product of the way in which the slides were counted. This slide is a representative sample of what you could expect in terms of the types of information in the twentieth-century painting and sculpture collection.

20th Century Painting & Sculpture

This table shows the top ninety-five artists in the 20th Century Painting and Sculpture collection, along with the number of slides representing them. There are many name-related errors on the slide labels, presented here "as is."
